Profile

I'm an aspiring Full Stack Developer passionate about creating web applications that solve real-world problems. Currently pursuing a BCA at Medi-Caps University, I'm focused on mastering frontend and backend technologies. I enjoy tackling algorithm challenges and building projects that combine creativity with technical skills.

Skills

Languages & Libraries: Java, JavaScript, HTML5, CSS3, React, Node.js, Express.js

Databases: MongoDB, MySQL

Tools & Platforms: Git, GitHub, Bootstrap, VS Code

Soft Skills: Communication, Teamwork, Problem-Solving, Adaptability, Time Management

Education

Bachelor of Computer Applications (BCA)

Medi-Caps University | 2023–2026

CGPA: 7.62

Higher Secondary (PCB)

Govt. Sr. Secondary School | 2023

Score: 80.40%

Secondary School (General)

The Sun Public Secondary School | 2021

Score: 88%

Projects

AI Chatbot Assistant

An AI-powered web assistant built using HTML, CSS, JavaScript with voice command and image upload support. It uses the Google Gemini API to generate intelligent

replies and includes a clean UI with dark mode toggle. Responsive and interactive.

[GitHub Repo](#)

Full Stack Contact Management App

A contact CRUD system built with React.js frontend, Node.js and Express backend, and MongoDB database. Supports contact submission, storage, updates, and deletions. Secure form handling, responsive design, and user feedback components.

[GitHub Repo](#)

Paste App – Online Code Snippet Manager

React.js-based web app for managing code snippets online. Allows developers to create, view, edit, and delete code entries. Features tag support, modern layout, and is deployed via Vercel.
